

Do-it-yourself scaffold

**RollFix<sup>®</sup>**

**Possible basic modules**

## Do-it-yourself scaffold

# RollFix®

The Rollfix range is our most economical scaffold. With fully robotic welded frames and a solid alloy construction, it will appeal to the trade and retail markets looking to own a quality but lower priced mobile scaffold. Available 'off the shelf' and in a range of different working heights.

**Standard traverse with foot plates**

**Standard traverse with 250 mm height adjustable and double braked 150 mm castors**

**Telescopic traverse with single braked 125 mm castors**

**With triangular 250 mm height adjustable telescopic outriggers**

## Product features

**Certificates: TÜV tested and with GS safety certificate**

Easy, fast and tool-free assembly.

Available with foot plates as a standing scaffold or with castors as a mobile scaffold. Platforms can be hung at any height, in any rung. Sturdy welded aluminium construction ensures low ballast requirements. Can be variably assembled in 1 m and 2 m steps and can also be used on stairs. Traverse beam enables easy attachment of ballasts and assembly in the middle and on a wall.

## Technical specifications

Conforms to DIN EN: 1004:2005-3, TÜV-tested.

Scaffolding class 3 with 200 kg/m<sup>2</sup> or 180 kg total load.

Material: high strength aluminium alloy. Working area on the flooring 1,5 m x 0,6 m. Max. working height outdoors and in closed rooms 10.2 m.

**Type of use:** Independent tradesmen, retail merchants, diy / home owners.
