

Saw Model RC6050

Item no.: 8951079001

- With blade change from the outside and exhaust air to the rear
- Handy and fast, with an insulated handle
- Lift: 10 mm
- Speed: 500 rpm

Saw blades

- Set of 5 blades
- Length: 93 mm
- Suitable for models RC6050 and RC6067

Saw Model RC6051

Item no.: 8951179000

- Cold-insulated handle
- 10 mm saw blade stroke
- Perfect for dimensionally accurate sawing of body parts, spars and profiles

Saw Model RC6067

Item no.: 8951079011

- Powerful pneumatic air saw with composite handle, suitable for cutting spars and multi-layer sheet metal parts
- With long saw blades, profiles and silencer pipes can be processed in one cut
- 10,000 strokes/min
- Can be converted to a pneumatic air file using an adapter (optional accessory)
- Handy and fast, with an insulated handle

Saw Model RC6070

Item no.: 8951000463

NEW

- A gear driven saw that is reshaping the landscape of maintenance
- Keyless blade changing mechanism and protective guards for perfect grip
- Max speed of 4,600 strokes/min., minimum speed of 4,200 strokes/min.
- Alternating speeds to choose between ultimate efficiency or prolonged blade life

Sheet metal nibbler Model RC6100

Item no.: 8951076008

- Ideal for cutting car body and aluminum sheets
- Cutting speed: 2.6 m/min
- Max. sheet thickness: 1 mm
- Cutting width: 4 mm
- Weight: 0.95 kg
- Noise level: 91.6 dB(A)
- Vibration: 8.55 m/s²
- Air connection 1/4"

Punch machine Model RC6301

Item no.: 8951076011

The RC6301 punch and stripping pliers is the ideal combination tool for welding preparation in bodywork and sheet metal processing

- For cutting and punching up to a maximum material thickness of 1.2 mm
- Punches 5 mm holes for weld preparation, also suitable for spot weld preparation
