Vacuum Upper Pool w/ Sections

+ In situations, which require practicalness and speed, will a sectioned vacuum plastic pool provide ease of use so that some materials are in your reach and not messed up.

Safety Latch

+ We have produced all drawers with safety latches in order to avoid a tilting of the tool cart when the drawers are drawn at the same time while using the tool cart moving.

Extension Cable Vice Usage

+ By using vices and extension cables at our carts for maintenance and service, we have provided the possibility for you by using vices and extension cables to establish your working environment wherever you wish, without being dependant on a power cable.

2 Drawer Models in a Single Module

+ Not every tool you use will fit into standard drawers, and therefore, we have combined 2 different drawer models, narrow, single door modules for high liquid containers in a single cabinet.

Long Type Drawers

+ There may be different needs in different industries, and for this we have tool carts with longer drawers with the same ergonomics.
