

PPE LOCKERS

Even if the models may vary, the usage purpose of PPE lockers in offices, at the production, in refectories or gyms is the same. While those in the production prefer full height cabinets or semi-door cabinets, small square cabinets are preferred for personal equipment or protective materials. We have produced narrow cabinets for limited spaces, aesthetic advantage providing Z type cabinets, cabinets with sloping tops in order to prevent in a bad look resulting storage of unnecessary equipment on the cabinets, 2 partitioned cabinets with a single door for a separate storage of dirty and clean goods, and cabinets with sitting banks where the personnel can change their clothes by sitting. Our aim is to prevent a chaotic and bad look at your business place and create clean and tidy personnel areas.

You can prefer all our cabinets with key lock, padlock or pin lock. It is possible to add a mirror holder, towel holder or soap holder upon demand.

Cloth Hanger

Padlock Holder

Ground Adjustable Ball Joint Feet

Plexiglass Door

Fixed Feet

Cabinets w/ Cloth Hanger

This product can be used as cloth cabinets for clothes that can stay unlocked together with the PPE lockers.

Lockable and Plexi Doors

With the plexiglass windows we used at our cabinets, you may easily see the materials in the cabinets without opening the cabinet doors.

Half and Full Height Doors

These cabinets can vary depending on the working cloth and shoes usage intensity of our personnel employed in the light and heavy industries. While semi-door cabinets can be used in the light industry, full height cabinets are suitable for full height working clothes and shoes in the heavy industry.
